

RIDIER PRESS & MEDIA

The RIDIER Journey — Film Storybook

A visual account of how a workplace moment moves from private conversation to organizational action.

RIDIER Press Kit — September 2026

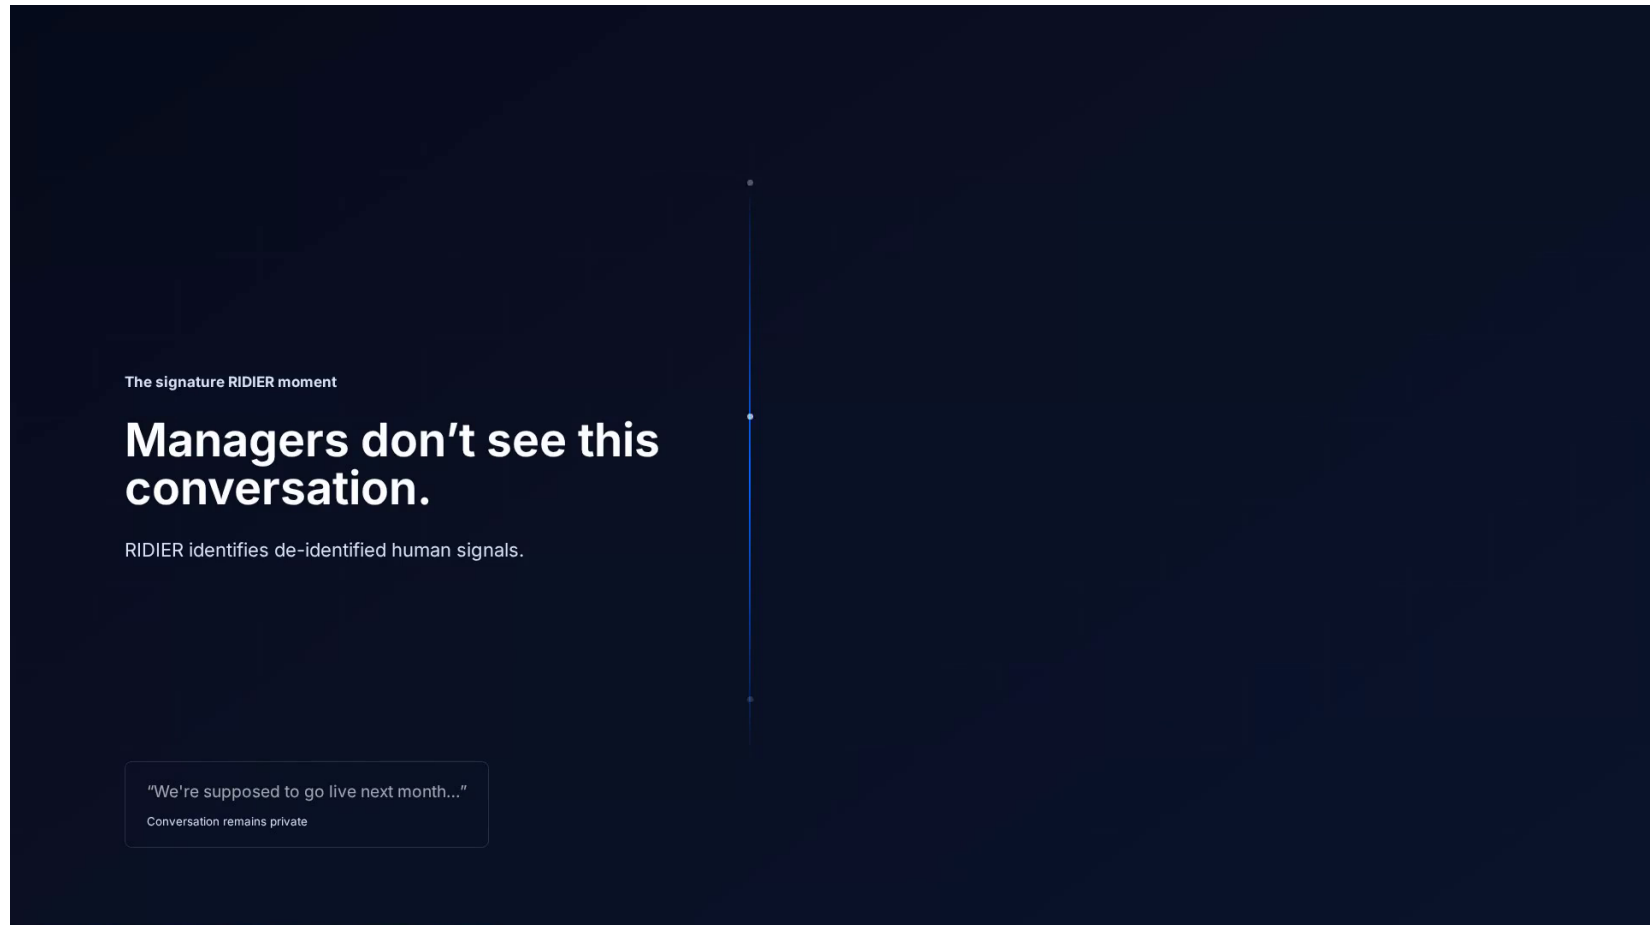

A private space to talk about work

Employees receive secure access and speak naturally with RIDIER.

Fictional Northwind Group demonstration · Individual conversations remain private · Aggregate reporting is threshold protected

RIDIER helps the employee reason

The conversation acknowledges context and asks at most one focused follow-up.

Fictional Northwind Group demonstration • Individual conversations remain private • Aggregate reporting is threshold protected

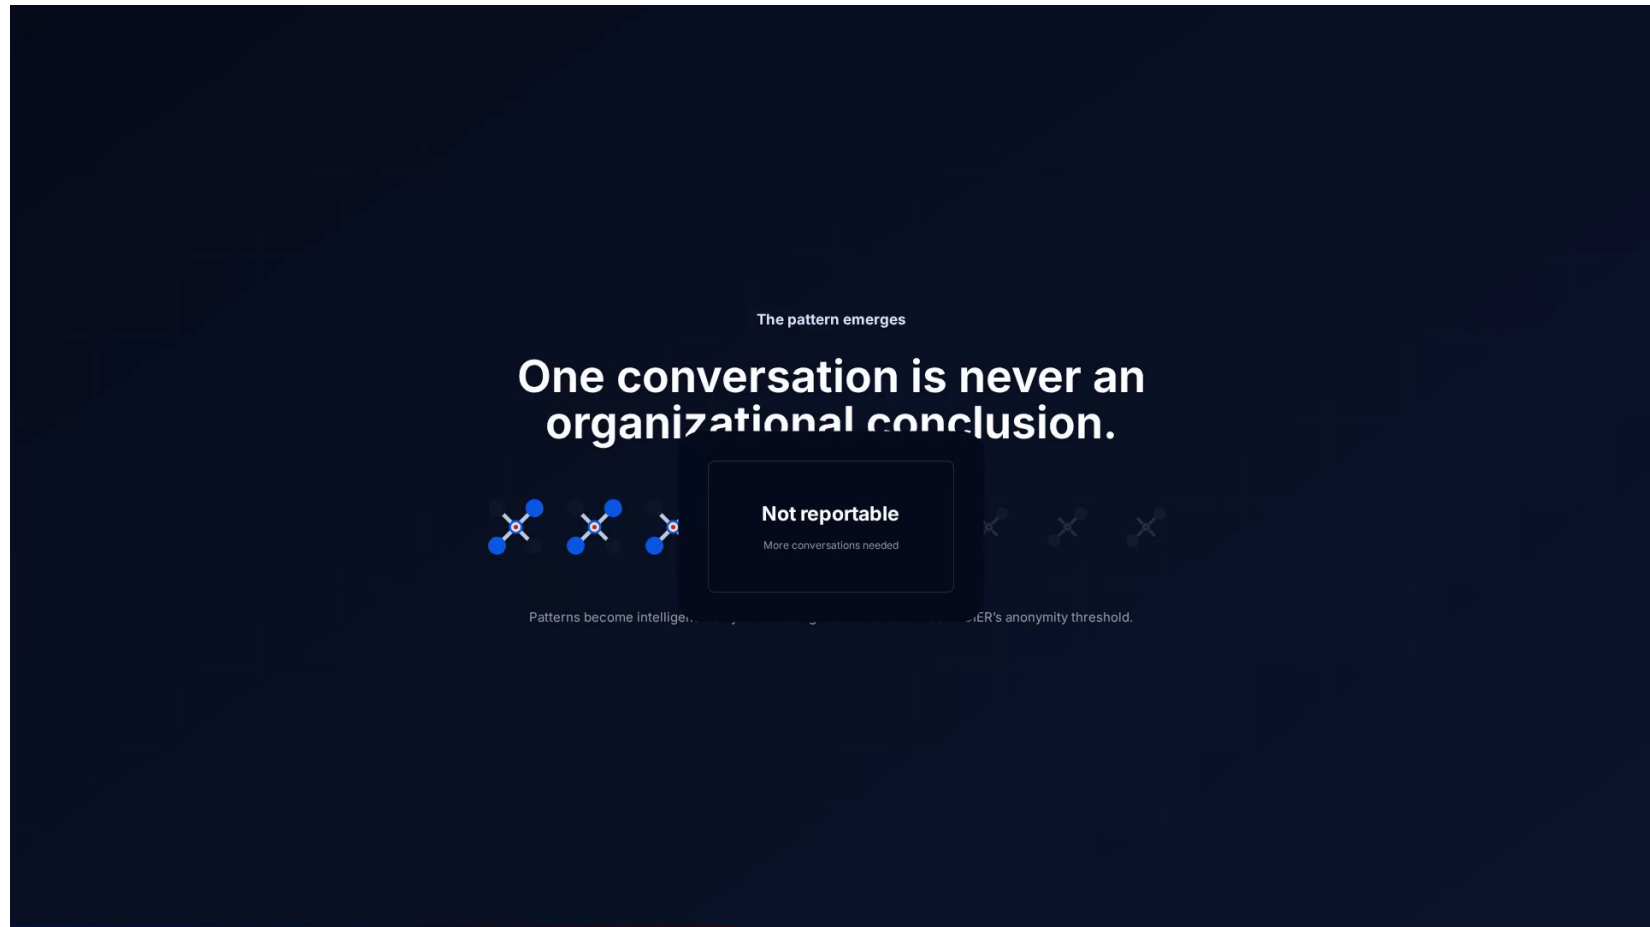

Managers don't see the conversation

Employee messages never become a manager-facing transcript.

Fictional Northwind Group demonstration · Individual conversations remain private · Aggregate reporting is threshold protected

Experiences become de-identified signals

PSI™ structures reportable human signals without exposing proprietary methodology.

Fictional Northwind Group demonstration · Individual conversations remain private · Aggregate reporting is threshold protected

One conversation is never a conclusion

Signals become aggregate patterns only after RIDIER's privacy threshold is met.

Fictional Northwind Group demonstration • Individual conversations remain private • Aggregate reporting is threshold protected

Leaders see the pattern—not the person

The executive view brings readiness, human signals and emerging risk together.

Intelligence points to attention

Fictional Northwind data shows readiness and human-signal conditions requiring focus.

Insight becomes action

The screenshot displays the RIDIER Insights dashboard. At the top left, it says 'RIDIER Insights'. On the top right, there is a label 'Fictional demonstration data'. The main heading is 'What's driving the risk?'. Below this, a card titled 'High impact' (in a red box) and 'Dallas Operations - Change adoption' contains the following information:

Clarity and manager confidence need attention.

What we're seeing	Change Clarity and Manager Confidence are weakening across recent aggregate periods.
Why it matters	These conditions are emerging as the strongest factors associated with declining readiness in Dallas Operations.
What we recommend	Clarify role-level process changes and equip managers with one consistent communication guide.

Observation from privacy-thresholded aggregates · Not a causal or predictive claim

RIDIER connects organizational risk to readiness and a recommended response.

The RIDIER intelligence loop

Listen. Understand. Measure. Identify risk. Act. Learn. Continue.

Your people are already telling you what's happening. RIDIER helps you understand what it means.

Film specifications

Approved product film · 1 minute 45 seconds · 1920 × 1080 · English narration · synchronized English captions · fictional Northwind Group data.
